

1. Create two html pages “**test\_css1.html**” and “**test\_css2.html**” by including the following HTML code.

```
<html>
  <head></head>
  <body>
    <p> Paragraph 1 Paragraph 1 Paragraph 1 Paragraph 1 Paragraph 1
    Paragraph 1 Paragraph 1 Paragraph 1 Paragraph 1 Paragraph 1</p>

    <p>Paragraph 2 Paragraph 2 Paragraph 2 Paragraph 2 Paragraph 2
    Paragraph 2 Paragraph 2 Paragraph 2 Paragraph 2 Paragraph 2</p>

    <p> Paragraph 3 Paragraph 3 Paragraph 3 Paragraph 3 Paragraph 3
    Paragraph 3 Paragraph 3 Paragraph 3 Paragraph 3 Paragraph 3</p>

  </body>
</html>
```

2. Observe the output of both html pages.
3. Change the font color of “**test\_css1.html**” into red and paragraph background color into Pink (Hint: use CSS)
4. Display three paragraphs in “**test\_css2.html**” three different colors namely Red, Green and Blue with the same background color Pink. (Hint: use CSS)
5. Remove the css code segment from “**test\_css1.html**” and save it as an external css as “**test.css**”
6. Display three paragraphs in “**test\_css1.html**” and “**test\_css2.html**” in three different colors namely Red, Green and Blue with the same background color importing “**test.css**”
